Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Notice of Amendment

In response to the amendment filed on November 28, 2006, new claims 37-40 and canceled claims 1-36 are acknowledged. The office action mailed November 29, 2006 is vacated due to the current amendment being filed November 28, 2006, previous to the mailing date of the office action. The following new grounds of rejection are set forth:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 37-40 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication No. 2004/0111011 to Uchiyama et al.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Art Unit: 3739

In regard to claim 37, Uchiyama et al. disclose a medical apparatus adapted for use with a capsulated medical apparatus 3, said capsulated medical device having an imager 11 for obtaining an image, said capsulated medical device transmits a signal of image data to an external reception apparatus 4 that is placed outside of the body, the medical apparatus 5 being placed outside of a body and is different from the external reception apparatus, the medical apparatus comprising: a communication section capable of at least receiving the image data of the image from the external reception apparatus (see paragraph 0037); a drive power supply section including a battery for supplying a driving power to at least the communication section; and a display section 6 for displaying at least the received image data (see Fig. 1).

In regard to claim 38, Uchiyama et al. disclose a medical apparatus, wherein the drive power supply section is further capable of supplying the driving power from an external power supply, as is well known in the art.

In regard to claim 39, Uchiyama et al. disclose a medical apparatus, further comprising a signal processor 29 which processes the image data to display the image (see paragraph 0044).

In regard to claim 40, Uchiyama et al. disclose a medical apparatus, wherein the communication section is capable of transmitting data to the external reception apparatus (see Figs. 1, 6 and 9).

Response to Arguments

Applicant's arguments with respect to claims 37-40 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
